

Address provided to PM

Tony Abbott, Prime Minister
Parliament Office. PO Box 6022
House of Representatives.
Parliament House, Canberra ACT 2600

Dear Prime Minister

History says they can be beaten

The 1st and 2nd World Wars were about stopping a German Dictatorship from overrunning and controlling the territory and people of Democratic Nations, which was to be the forerunner to World Dominance by a German Dictatorship. Democratic Nations united and stopped these German Dictatorships and eliminated the threat to World Dominance by a German Dictatorship.

You may not outwardly be aware of it, but most likely inwardly know of it, that Australia, a Democratic Nation, is under economic threat from Dictatorships led by China. Their purpose and intent is the same as that of 1st and 2nd World Wars i.e. to overrun and control the territory and people of Democratic Nations as the forerunner to World Dominance by a Chinese Dictatorship.

The Dictatorships led by China made a significant advance in the 3rd World Economic War, by the signing in July 2014 of the BRICS Nations Agreement (China, Russia, India, South Africa, Brazil and Argentina) which puts China in economic control of 45% of the World Population. This includes the majority of the population of the 53 Commonwealth Democratic Countries with Her Majesty The Queen as its 'Head'. As Head, The Queen personally reinforces the voluntary links by which the Commonwealth joins democratic people together from around the world. The Queen's role in India and South Africa is now under threat.

You may not outwardly be aware that the 3rd World Economic War has been in progress for over 30 years. When a Dictatorships exports its goods and services to Democracies these are priced at the high prices in the Democracies less a % to get the business. These prices provide Dictatorships with SUPER CASH RECEIPTS which they have accumulated to buy the assets, including land, infrastructure, businesses, intellectual property and workforce, of the Democracies.

The 2% Spending Tax is not an option, it is an imperative, if the Democracies are to win the 3rd World Economic War and stop the Chinese Dictatorship from achieving World Dominance. Australia has the opportunity to unite the World's Democratic Nations, presently economically lame as an outcome of trading with Dictatorships for over 30 years. Please read the attached last page from the Taxation Summit Presentation 26th May 1985.

I have provided you with the information you need to assess and implement the 2% Spending Tax. Please read the attached document of the 'why and how' which is well within the capacity of Australians to implement and be successful with. You remind me of British Prime Minister Neville Chamberlain in 1938, desperate to find favour with a disenfranchised Electorate and Parliament, rushing overseas and signing agreements without understanding the thoughts behind the face. The pressing priority for you and your Government is to implement the 2% Spending Tax within the next 12 to 18 months. I will make myself available if you need help with this. **Time is of the essence.**

Yours sincerely

Derek Smith CA
Australian Citizen and supporter of Her Majesty The Queen of Australia, our Head of State.

BRIEFLY why the 2% Spending Tax is an ‘imperative’ and how it will stop Dictatorships led by China from overrunning and controlling the territory and people of Australia and other Democratic Nations as the forerunner to World Dominance by China

2% Spending Tax is an ‘imperative’ because currently

1. All levels of Government have to increase taxation and charges or sell-off assets to balance their budgets, and provide surpluses to pay-off unsustainable debt.
2. This increase in taxation and charges inflates the prices of Australian goods and services. This plays into the hands of China and others, to increase the prices of their exports to Australia sending more Australian cash to China etc which they accumulate to buy Australians’ land, infrastructure, businesses, intellectual property, etc. so that Australians become tenant workers for foreign Dictatorships
3. Cash from Australia and other Democracies is taking away the Sovereignty of Australians so that their Government and Her Majesty The Queen of Australia our Head of State are in name only. Progressively Dictatorships are calling the tune for Australians to follow. Sounds very familiar.
4. The Governor-General, Prime Minister, Government and other Members of the Parliament of Australia either do not understand the reality of (2) and (3) or will not understand it, until it is too late.

Something we know has to happen if (1) to (3) above are to be stopped and the Sovereignty and Democracy of Australians is to be made good and protected from Dictatorships and Bad Government.

1. Australian goods and services need to be more competitive at home and abroad to reduce imports and increase exports for new jobs, growth and wealth creation to reduce the financial demands on Government, to pay-off debt and then save for lean times.
2. To achieve (1) Australia needs to reduce its prices and have available continuity of supply.
3. To achieve (2) Australia needs to reduce its costs including of labour, and increase productivity and the availability of high skilled labour at a lower cost.
4. The standard of living and lifestyle of Australians must be retained and all Australians given the opportunity for employment and financial security outside of Government. A job is the best welfare.
5. All Government in Australia must manage their affairs consistent with at least the National Commission of Audit 2014 TEN CORE PRINCIPLES OF GOOD GOVERNMENT.

The 2% Spending Tax can make (1) to (5) above a reality by

1. Government foregoing taxes on incomes, fringe benefits, capital gains, business profits, payroll, goods and services and super-funds so that the prices of all goods and services of all businesses and government are reduced by the total amount of these taxes.
2. lowering the price as in (1) of all Australian goods and services will cause exporters to Australia including China to reduce the prices of their exports to Australia. This will reduce their SUPER POSITIVE CASH RECEIPTS and financial capacity to buy Australians’ Sovereignty.
3. Australian industry becoming price and capacity competitive at home and abroad to increase production for domestic and export markets.
4. retaining employees’ take-home-pays, other incomes, gains and business profits at their existing net of tax levels. These net of existing tax incomes etc and all savings, super-funds and \$Billions stashed away, will have increased purchasing power to buy more goods and services including those presently provided by Government out of the public purse.
5. lowering prices of all goods and services and increasing the purchasing power of retained net of tax incomes etc., Australians will have the capacity and confidence to get on with their lives and spend to increase employment, growth and wealth creation.
6. all levels of Government shifting spending from the public purse to the private purse on a user-pays freedom of choice basis. This will reduce the size and cost of all levels of Government.
7. abolishing the taxes as in (1) to substantially reduce the cost of compliance and payment of the taxes, for all businesses and individuals and for all levels of Government.
8. having smaller and much reduced cost of Federal/State/Territory Government fully funded by a 2% Spending Tax on all changes of ownership, real and beneficial except within a “family” as defined by the Federal Government and Parliament of Australia,
9. a 2% Spending Tax on additional earnings, benefits and gains providing the incentive to all Australians to work and take on new skills for higher levels of pay, and for businesses a 2% Spending Tax on purchases including labour and sales providing the competitiveness and capacity to expand and increase their market share to reduce imports and the CASH FLOW to CHINA and OTHER DICTATORSHIPS thereby making good and protecting the Sovereignty and Democracy of Australians.
